

WINDHAM HILL'S  
**WINTER SOLSTICE**

## Todd Boston Biography

Hello and welcome, Music is a miracle and a gift. Music teaches us to listen, to breathe to the rhythm of life and to harmonize to the world around us. Music teaches us to be present in the Now!

From a young age and with the encouragement of my parents I was exposed to great music and supported to explore playing musical instruments.. At the age of 11 in a turbulent time of life my cousin handed me a guitar and Music became the medicine for my soul.

Music became an ally, a teacher, a friend. Music has taught me patience, empathy, meditation and discipline, it has taken me around the world and shown to me miraculous occurrences that defy everyday logic. It has taught me to listen deeply, to trust my intuition and to be present in the moment.

Music is truly something special that connects us all which is why I have dedicated my life to creating and sharing Music that is positive and uplifting. My hope is that in my Music you will find a sense of connection, support, depth, optimism and peace. May this Music serve to help you to connect to something deeper inside of you, to feel connected to your heart and to listen deeply.

"Touched by the Sun is the work of a mature artist who has come of age and who has given us a great recording of singularity and value, the world's a better place for his gift."

~ *Will Ackerman (Grammy winning guitarist, founder Windham Hill Records)*
